***dark_underbelly_of_the_world_wide_web.txt**
by monica kumaran

this poem is about original sin:

```
ssh eden
cd garden
ls -l
cat adam.exe | grep "a soul"
./adam.exe | eve.exe
rm -f adam.exe
git commit -m " u rde r"
exit
```

this poem is about not getting asked to prom:

```
zip(["boy_1", "boy_2", "boy_3"], ["girl_1", "girl_2", "boy_4", "me"])
```

this poem is about the end of the universe:

```
sudo su god
rm -rf *
```

this poem started life from a smaller poem, written by a friend who was cold (hands, shallow shoal heart):

```
me = defaultdict(3)
me["you"] = int('inf')

def sweetOn(you):
  for _ in range(me[you]):
    yield "love"

f = sweetOn("you")
>>>f.next()
'love'
>>>f.next()
'love'
>>>f.next()
'love'
>>>
```

this poem is after the afterparty:

byte romeo = (byte) 0b00101010 == (int) 42;
byte juliet = (byte) 0b00011101 == (int) 29;

\\taking a bit out to make a new byte
byte lovable_experiment = romeo | juliet = 0b00111111 == (int) 63;

/* this kid is energetic! odd prime, like you!
  no- 2*2*7->3*3*7, like you!
  wow, you're right- you always were the smart one, honey! */

\\taking a byte out to make a bit of bytes
byte golden_child = romeo & juliet = 0b00001000 == (int) 8;

/* we're so lucky, shy but studious.
do 8's factor in your side of the family?
no, not really.
i thought she'd be just like us.
she's just like us, and nothing like us at the same time?
her great grandpa was a single digit too - 0b00000001 */

\\hey, let's not byte off more than we can chew
\\i concur, 2^1 is exhausting without a multiprocessing unit- a new server farm is opening in hawaii next year, should we transit?
\\aww that sounds like a great idea...but.....why are we still in single-line comments?.....oh no.
byte we_love_surprises = romeo ^ juliet = 0b00110111 == (int) 55; \\wild child

/* .....
....
.....
....
..... */

/* oops */

\\.... .... . .
\\you know, i always had a thing for family trees. 2^2?
\\.....mom was right about men who are too even

Moon Poem

By Monica Kumaran

© 2026 Monica Kumaran

Sonic Interlude:

Romanticism;

transcendence;;

(Bram Stoker Bram's Strokes | Mary & Percy are two sides of the same coin; {a sophomoric victory in finding the meaning of life | the pinnacle of the West }; communion with nature is the only salvation there is); nevermore nevermore;

I dedicate this soliloquy to e.e. cumm(in)gs x h[e]art crane's very own love child, which is to say nobody in particular at all. The leeward side of the moon // its friendly face to us and them.
